

CATALOG RUBBER BOOTS

2012 - 2013

ILSE JACOBSEN LACE-UP

Ladies rubber

Article : 778284

DETAILS

These handmade rain boots can withstand even the hardest torrential downpour. Made specifically to deal with wind and water, our rain boots can help you love the rain. We have chosen to make our rain boots out of the finest single-estate 100% natural rubber from sustainable harvests. This pure, natural rubber is mixed with our own secret recipe, making the fundamental composition 85% pure, natural rubber and 15% secret recipe. Entirely PVC-free, our boots contain no animal by-products. The result is a sturdy and reliable companion for rainy days. To make sure that your feet stay dry and comfortable, we have lined our rain boots with a mixture of 60% viscose and 40% cotton. In addition to this, we have placed nice and warm inner soles in them, made of 45% viscose, 35% polyester & 20% polyacrylic. The cold won't ruin your rain boots - our soles are made of lightweight EVA, withstanding temperatures down to -40 degrees celcius, and our rubber uppers withstand temperatures down to -20 degrees celcius. Our laces are made of 100% cotton, and can be adjusted to fit your legs perfectly. New laces are available in several lengths and colours, made to fit each individual wellie. While our laces are machine-washable, we recommend that you place them in a washing bag first, so that they don't tie themselves into knots. Available in over 100 varieties, our RUB collection encompasses a myriad of colours and styles. Go ahead! Jump in that puddle!

SIZE : 34 - 41

COLOUR : Black, Grey, White, Beige, Brown, Camel, Red, Pink, Rubino, Orange, Army, Lime, Forest, Plum, Lilac, Turquoise, Petroleum, Yellow, Raspberry
